Humanitarian Situation Report No. 8

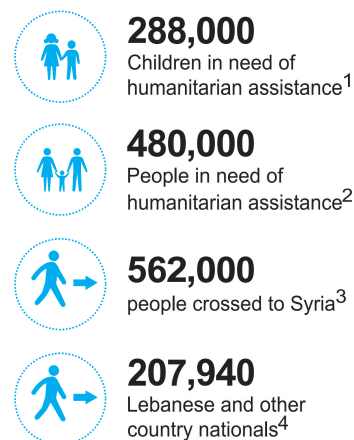

Reporting Period
16-30 November 2024

Syrian Arab Republic

HIGHLIGHTS

- As of 28 November, approximately 562,000 people including around 326,000 children had crossed into Syria due to escalating hostilities in Lebanon.
- Since 27 November, following the ceasefire in Lebanon, about 34,000 people crossed from Syria back into Lebanon through the Jdaidet Yabous and Joussieh crossing points.
- On 27 November, military escalation in Aleppo spread to the northwest governorates, displacing tens of thousands. The volatile situation has made it increasingly difficult to provide humanitarian aid to the affected populations, including IDPs and Syrian returnees.
- During the reporting period, 1,000 pregnant and breastfeeding women received nutrition supplements to prevent anemia, while 1,189 children received micronutrient powders, and 1,097 children received lipid-based supplements.
- In the reporting period, UNICEF successfully delivered essential water supply and sanitation services to over 25,000 individuals, safeguarding public health and preventing water-borne disease outbreaks.

SITUATION IN NUMBERS

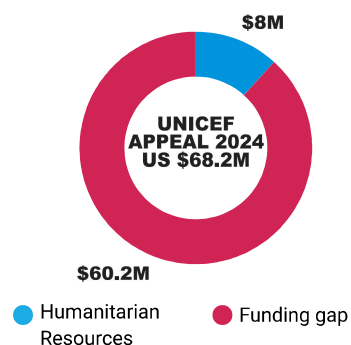

UNICEF RESPONSE AND FUNDING STATUS*

Category	Sub-category	Percentage
Health	Access to PHC	22%
	Funding status	22%

FUNDING STATUS (IN US\$)**

** Funding available includes: funds received in the current year; carry-over from the previous year; and repurposed funds with agreement from donors

FUNDING OVERVIEW AND PARTNERSHIPS

The UN and other humanitarian actors launched an Inter-Agency Flash Appeal on 7 October 2024 to respond to the humanitarian consequences of the escalation of hostilities in Lebanon - notably the influx of population seeking refuge in Syria.⁵ Based on the indicative population in need, UNICEF's preliminary funding requirements stands at US\$ 68.2 million⁶ for a period of 6 months. Currently, only USD 8 million has been secured, resulting in a funding shortfall of 80 per cent for UNICEF.

UNICEF would like to thank the Governments of Japan and Germany (German Federal Foreign Office) for funds received so far. UNICEF has also allocated core resources and received Global Humanitarian Thematic Funds, providing vital, flexible resources to enable UNICEF to adapt and expand its response.⁷ UNICEF is grateful to partners for this critical support which allows the provision of timely and effective assistance. However, additional funding is still required to meet the increasing needs – without these funds, UNICEF's ability to provide essential life-saving assistance to children will be hindered.

SITUATION OVERVIEW AND HUMANITARIAN NEEDS

As of 28 November 2024, approximately 562,000 people⁸ including around 326,000 children⁹ have crossed into Syria due to escalating hostilities in Lebanon.¹⁰ An estimated 63 per cent of those entering Syria are Syrian nationals, while the remaining 37 per cent comprise of Lebanese, as well as a small proportion of nationals from other countries.¹¹

UNRWA¹² has reported that as of 24 November, approximately 1,176 displaced Palestine Refugee families (approximately 3,373 individuals), had arrived in Syria from Lebanon and contacted UNRWA.

In northwest Syria, around 4,188 individuals (868 households) arrived through the Aoun al-Dadat internal crossing point, with an estimated 70-80 percent being Syrian returnees. However, since 1 November, the Aoun al-Dadat crossing has been closed, and no further crossings into northwest Syria have occurred.¹³

Following the ceasefire in Lebanon on 27 November ceasefire there were still arrivals of populations into Syria, with an estimated number of 12,000 individuals (including non-Lebanese third-country nationals) who entered Syria until 4 December.¹⁴ At the same time, over 40,000 people (including around 34,000 Lebanese Refugees) have returned to Lebanon through the Jdaidet Yabous, Joussieh, and Al Arida crossing points in Rural Damascus, Homs, and Tartous governorates.¹⁵

Meanwhile, since 27 November, an escalation of hostilities in Aleppo which later spread to other governorates in northern Syria, has forced tens of thousands to flee their homes. The widespread displacement of civilians has affected the entire region as the security situation remains fluid and very unpredictable. The hosting centres in Hama, Homs, Tartous, and Rural Damascus, which were previously housing Lebanese before the ceasefire in Lebanon, are now hosting people displaced within Syria. According to OCHA¹⁶, for example the Herjeleh hosting centre in Rural Damascus is nearing its capacity of 450 families (2,500 people) due to the recent influx of families displaced by ongoing hostilities in Northwest Syria.

For the time being, information on the situation and humanitarian response following the recent escalation of hostilities in northern

Syria is available in OCHA Whole of Syria Flash Updates¹⁷ which includes contributions from UNICEF and the clusters led by UNICEF.

SUMMARY ANALYSIS OF PROGRAMME RESPONSE

Health

UNICEF and its partners continued to deliver essential primary health care services to support the health and well-being of displaced children and women. These services ensure that children and women receive preventive care, vital vaccinations against preventable diseases, care for both acute and chronic conditions, referrals for specialised care, and urgent hospital admissions when required.

During the reporting period, 5,828 primary health consultations were provided, including 2,948 children (1,417 girls and 1,531 boys), 2,698 women, and 182 men.

UNICEF also ensured essential immunisations for children under one year old. The measles, mumps, rubella (MMR) vaccine was given to 27 children (11 girls and 16 boys). The diphtheria, pertussis, tetanus (DPT3) vaccine was administered to 13 children (5 girls and 8 boys). The polio vaccine (IPV) was provided to 40 children (20 girls and 20 boys), and the oral polio vaccine was given to 1,184 children (561 girls and 623 boys).

Community-based dialogues and awareness-raising activities on maternal and child health reached 3,030 people, including 68 girls, 76 boys, 2,344 women, and 542 men.

UNICEF had reassigned some of the mobile teams supporting the existing UNICEF programmes to provide services to Syrian returnees under adverse circumstances and Lebanese at crossing points, hosting centres and host communities in Tartous, Lattakia, Homs, Hama, Rural Damascus, and Ar-Raqqa governorates. This re-deployment affects the provision of services and impacts the health and nutrition services for other vulnerable communities in Syria. Due to limited resources, existing services are overstretched to prioritize the influx from Lebanon.

Nutrition

UNICEF and partners continued to provide nutrition services to affected children and women, focusing on prioritizing prevention while sustaining early detection and treatment of life-threatening wasting. UNICEF provided essential nutritional services supporting the Syrian returnees under adverse circumstances and Lebanese refugees at crossing points. During the reporting period, nutritional supplements to prevent micronutrient deficiencies, especially to prevent anemia, were provided to 1,000 pregnant and breastfeeding women. In addition, 1,189 children aged 24 to 59 months (550 girls and 639 boys) received micronutrient powders, while 1,097 children aged 6-23 months (518 girls and 579 boys) received lipid-based supplements. To protect and promote optimal nutrition during early childhood, infant and young child feeding (IYCF) support was provided to 1,518 caregivers, including pregnant and breastfeeding women. An estimated 1,886 children (873 girls and 1,013 boys) were screened for wasting, and 7 children (4 girls and 3 boys) received lifesaving care and treatment, bringing the total number of children who have received treatment from UNICEF supported programmes since the beginning of the crisis to 59.

Water, Sanitation and Hygiene (WASH)

In the reporting period, UNICEF continued delivering essential water supply and sanitation services to over 25,000 individuals, safeguarding public health and preventing water-borne disease

outbreaks, ensuring that people have adequate access to safe water, sanitation, and hygiene services.

1,783 individuals (890 children and 893 adults).

At Al Arida crossing point in Tartous, UNICEF provided 25,000 liters of drinking water daily, benefiting approximately 600 individuals. In Lattakia, at the Al-Baseet hosting centre, 30,000 liters of drinking water were delivered each day, meeting the needs of 2,170 people. Furthermore, 10 water tanks, each with a capacity of 2,000 liters, were procured and installed. At Herjeleh hosting centre in Rural Damascus, UNICEF provided 50,000 liters of drinking water daily, benefiting over 600 individuals. At Jesr Al-Qamar crossing point in Homs, four drinking water tanks, each with a capacity of 2,000 liters and installed at the end of October, continue to provide daily water supply to over 400 people.

Furthermore, UNICEF is implementing a significant sanitation rehabilitation project in Sayyeda Zeinab, Rural Damascus, which involves installing 700 meters of concrete sewage pipes which will benefit over 30,000 individuals including Syrian returnees under adverse circumstances and the host community. UNICEF has supported sanitation at Al-Arida and Jousseih crossing points in Tartous and Homs, where prefabricated gender-segregated toilets were installed and maintained to serve over 800 individuals daily. Additionally, the desludging of existing sanitation facilities and the rehabilitation of water lines at Jesr Al-Qamar crossing point in Homs have been completed.

Due to missile attacks at Al Arida in Tartous crossing point on 27 November water trucking was temporarily halted. A prefabricated toilets unit was destroyed, rendering it out of service and unrepairable.

Child Protection

Within the Child Protection humanitarian response, UNICEF has prioritised supporting children and families through Mental Health and Psychosocial Support (MHPSS) services, including Psychological First Aid (PFA), parenting programs, and case management. Throughout the second half of November, critical services were sustained across several governorates including Homs, Hama, Idlib, Tartous, Lattakia, Aleppo, and Rural Damascus.

In Homs and Hama governorates, Child Protection services were provided to Lebanese children and families at three hosting centres (Al Sum Wa Al Bukm, Tal Gazale, Mar Elias, and Al Adra Church). In Tartous and Lattakia, support was delivered across multiple shelters, with nine shelters reached in total. In Aleppo, the response focused on vulnerable children and families in the community, as no hosting centres were established. In Rural Damascus, services continued in various communities and at the Herjeleh hosting centre, with SARC deploying mobile teams in Lattakia and Tartous.

In the reporting period, 29 children (18 girls and 11 boys) received case management services, and 109 children (54 girls and 55 boys) were referred to additional support services. Mobile teams provided structured psychosocial support (PSS) to 226 children (102 girls and 124 boys) and PFA to 1,164 children (567 girls and 597 boys) and 745 adults (459 women and 286 men). Furthermore, 325 children (138 girls and 187 boys) participated in recreational activities, and the Parenting Support Programme engaged 94 caregivers (76 women and 18 men).

In addition to the Child Protection support services, explosive ordnance risk education reached 940 children (449 girls and 491 boys) and 810 adults (490 women and 320 men). Awareness-raising sessions on Child Protection reached 1,082 children (553 girls and 529 boys) and 237 caregivers (112 women and 125 men). GBV awareness raising sessions engaged 196 children (106 girls and 90 boys) and 234 women, while PSEA activities reached 2,079 people (1,177 children and 902 adults), with additional messaging reaching

variations in immunisation schedules, educational systems, and linguistic barriers contributing to susceptibility to bullying among their children. As a result, the SBC team has been working closely with Child Protection and Health teams to address the specific information needs of those families. A package of materials on bullying has also been produced and is being used by volunteers.

Education

In the reporting period, UNICEF reached 3,673 children (1,837 girls and 1,836 boys) with formal education and 5,258 children (2,635 girls and 2,623 boys) with non-formal programmes. Furthermore, 495 children (289 girls and 206 boys) aged 3 to 5 were reached with Early childhood education (ECE) services. In Northeast Syria (NES), a total of 3,423 children displaced from Lebanon (less than one per cent are Lebanese) have been enrolled in 120 formal schools, primarily in Ar-Raqqa and 3 per cent of displaced students enrolled in Al Hasakeh.

During the reporting period, UNICEF partners provided non-formal education (NFE) support in camps across northern Syria and in the governorates of Tartous, Lattakia, Al-Hasakeh, and Ar-Raqqa. A total of 3,516 children in both formal and non-formal education received UNICEF stationery kits in Al-Hasakeh and Ar-Raqqa.

Adolescent Development and Participation (ADAP)

UNICEF has actively mobilized the trained youth volunteers in the emergency response, also involving them in data collection efforts. Since the onset of the response, 154 trained youth volunteers (100 young women and 54 young men) have been mobilized. During the reporting period, 6 trained young volunteers (4 young women and 2 young men) participated in the Syria Needs Assessment Tool (SYNAT), a UNHCR-led assessment, in hosting centres in Tartous.

UNICEF also supported sports for development and cultural activities for affected 1,498 young people (including 839 girls and 659 boys) as a means of psychosocial support, fostering social, emotional, and physical development and well-being promoting social cohesion. During the reporting period, mobile teams of UNICEF's ADAP partners provided psychological first aid (PFA) through recreational, cultural, and sports activities, engaging 70 displaced children and adolescents including 35 girls and 35 boys in hosting centres and communities in Rural Damascus, Tartous, and Homs governorates. 16 young volunteers (10 young women and 6 young men) actively facilitated these sessions for affected children and adolescents.

UNICEF and ADAP partners continued to provide 124 affected young people (including 111 young women and 13 young men) with learning opportunities, skills development, and support for youth-led initiatives. During the reporting period, knitting and recycling workshops were conducted at the Herjeleh hosting centre in Rural Damascus for 28 Lebanese young women and mothers.

Social and Behavioural Change (SBC)

In response to the identified needs of families displaced by the conflict in Lebanon, Social and Behavioural Change (SBC) teams focused on integration activities with host communities and shared necessary information regarding key services. In the Northeast Syria (NES) governorates of Al-Hasakeh and Ar-Raqqa, SBC teams conducted 48 in-person breastfeeding sessions, alongside screenings for routine immunization status to evaluate nutritional status and make referrals to health centres as needed.

In Rural Damascus and Deir-ez-Zor governorates, the Directorate of Health (DOH) teams conducted health and hygiene promotion sessions in hosting centres and among host communities, acknowledging the diverse needs of returnee families.

In Homs and Hama as well as in Tartous and Lattakia governorates, many Lebanese families have been returning back to Lebanon. However, those remaining are facing unique challenges including

3

Prevention of Sexual Exploitation and Abuse (PSEA)

During the reporting period UNICEF ensured lifesaving PSEA activities for the affected people, where 1,000 women, girls, and children were reached with PSEA life-saving messages through

During the reporting period, a total of 18,513 individuals participated in Health and Hygiene Group Sessions across various locations, including 4,575 men, 11,581 women, 1,122 boys, and 1,235 girls. In addition, 778 individuals were reached through Health and Hygiene Awareness initiatives, comprising 172 men, 527 women, 36 boys, and 43 girls.

Accountability to the Affected Population

In Aleppo, efforts to promote Accountability to Affected Populations (AAP) focused on raising awareness among rights holders and building the capacity of implementing partner (IP) staff, particularly in managing complaint and feedback mechanisms. Twelve awareness sessions were conducted across seven centers (clinics, educational centers, protection and adolescent development centers) operated by two partners in Aleppo city, where health and nutrition, education and ADAP activities are provided. These sessions engaged 186 individuals, including 40 IP staff, 54 caregivers and youth (45 women and 9 men), and 92 children (46 boys and 46 girls). Flyers with AAP principles and UNICEF service line information were distributed to all participants.

In addition, 16 community consultation sessions were held across six governorates to enhance community engagement and establish feedback mechanisms. These sessions ensured active community involvement in decision-making and the integration of their input into programme implementation.

These efforts strengthened the capacity of IP staff to manage AAP mechanisms and raised awareness among caregivers, youth, and children about their right to raise concerns

During the reporting period, the UNICEF service line received 98 calls, including 12 complaints, and requests for support from displaced Lebanese and Syrian families, who were referred to UNHCR community centres. The complaints received included poor services provided by a financial service provider and an implementing partner, concerns about exclusion from receiving cash transfers for basic needs (CTBN), challenges in accessing primary healthcare services. Further, the callers expressed a variety of new needs, including requests for food kits, and a job opportunity. They also sought support for medical services, such as dental care and surgeries, as well as disability aids. Inquiries included questions about the registration process for cash support for basic needs and for children with disabilities. Callers also asked about payment distribution dates, contact details and addresses of UNICEF implementing partners, and clarifications regarding the AAP messages families receive. UNICEF distributed 4,400 flyers and 5,200 cards with key AAP messages and service line contact information in Aleppo, Homs, and Hama through eight active implementing partners.

Winterization

To meet winter needs, UNICEF provided essential items in Aleppo to Syrian returnees under adverse circumstances, including 333 blankets benefiting 333 children (162 girls and 171 boys) and 68 winter clothing kits benefiting 68 children (26 girls and 42 boys). These supplies were tailored to suit various age groups, ensuring that those affected received appropriate assistance.

group discussions at hosting centres in Homs and Latakia governorate. This outreach was made possible through strong internal coordination between UNICEF and the WASH sector. At the PSEA network level, 50 partner staff, including SARC, were trained on key PSEA risk mitigation measures during the emergency response. The distribution of solar torches to enable safe access to WASH facilities at night was a key part of this effort, benefiting 1,000 individuals. A package of solar torches, PSEA flyers containing contextualized messages, and SEA reporting mechanisms were also distributed.

HUMANITARIAN LEADERSHIP, COORDINATION AND STRATEGY

UNICEF's humanitarian strategy aligns with the Inter-Agency Emergency Appeal for the Influx from Lebanon to Syria, as well as the priorities set by relevant sectors and programmes.

UNICEF continues to lead the Nutrition, WASH, and Education sectors and Child Protection Area of Responsibility (AoR) at national and sub-national levels. Additionally, UNICEF contributes to the Health, Gender-based Violence, Gender, and Livelihoods Working Groups and co-chairs the PSEA In-Country Network meetings. All UNICEF-led sectors are holding regular meetings at national and sub-national levels to ensure an optimal response to the ongoing influx of displaced Syrians returnees and Lebanese refugees. At the interagency level, UNICEF continues to support efforts to review existing standard operating procedures (SOPs) for recording SEA complaints. UNICEF is also coordinating with line ministries on the emergency response as part of its regular programmes.

During this reporting period, Child Protection AoR partners reached 4,260 individuals, including adults and children, with age-appropriate awareness messages on various child protection topics. These messages included topics such as PSEA, child rights, prevention of family separation, mine risk education, and available child protection services. The outreach reached 2,306 children (1,021 boys and 1,285 girls) and 1,954 adults (1,333 women and 621 men). In terms of mental health and psychosocial support (MHPSS), 4,323 beneficiaries were reached, including 2,875 children (1,421 boys and 1,454 girls) and 1,448 adults (512 men and 936 women), helping to restore normalcy for affected children and caregivers. Additionally, 219 children (101 girls and 118 boys) received multi-sectorial case management services, with professional social workers conducting follow-ups to ensure continued support. The Child Protection AoR, in partnership with IMC and UNICEF, trained 106 partner staff in Rural Damascus and Deir-ez-Zor governorate on MHPSS and explosive ordnance risk education (EoRE). Amid ongoing challenges, children across Syria, including Lebanese children, participated in World Children's Day celebrations on 20 November. The theme, "Listen to the Future," called for advocacy to prioritise children's rights and end hostilities against children, both directly and indirectly.

The Nutrition sector continues to focus on improving children's nutrition by providing accessible, high-quality preventive and curative services. Efforts continue to focus on the early detection and treatment of life-threatening wasting, aiming to prevent undernutrition.

NEXT SITREP: 08 JANUARY 2025

UNICEF remains committed to supporting children and families crossing into Syria, even as a ceasefire brings a measure of relief amidst Lebanon's ongoing crisis. With this brief period of stability, UNICEF is strengthening its efforts to address the immediate needs of displaced families and children. By producing and sharing compelling content—including photo stories, videos, and social media toolkits—UNICEF highlights the challenges these families face and emphasizes the critical assistance provided at border crossings and hosting centres.

UNICEF will continue utilizing its social media platforms to deliver actionable messages with clear calls to action, encouraging engagement with its appeals and reports. Supporters are encouraged to amplify these messages within their networks, ensuring that UNICEF's life-saving efforts reach those in need and that the voices of vulnerable children and families are heard globally.

Through its social media channels, UNICEF shares practical, actionable messages with clear calls to action, urging audiences to engage with ongoing appeals and reports. Supporters play a vital role in amplifying these messages within their networks, extending the reach and impact of UNICEF's lifesaving response. ENDNOTES

1. Inter-Agency Emergency Appeal for the Influx from Lebanon to Syria, Oct 2024 to March 2025.
2. Inter-Agency Emergency Appeal for the Influx from Lebanon to Syria, Oct 2024 to March 2025. The figure includes Lebanese, Syrians, and 5,000 Palestine refugees in Lebanon, as well as 80,000 Syrian host community member.
3. UNHCR Syria Emergency Response Brief, 28 November 2024.
4. Number of Lebanese is estimated based of the proportion of 37% as stated in the UNHCR Syria Emergency Response Brief, 21 Nov 2024.
5. Inter-Agency Emergency Appeal for the Influx from Lebanon to Syria, October 2024 to March 2025
6. UNICEF's funding request is part of current HAC 2024 and will also be included in HAC 2025.
7. UNICEF wishes to thank its partners who have contributed flexibly to core resources and thematic funds and extends special thanks to its National Committees. Additionally, UNICEF is grateful to the Governments of the United States, United Kingdom, Germany, Sweden, Norway, Netherlands, Switzerland, Japan, Australia, and Canada as the top global providers of core and thematic support in 2023.
8. UNHCR Syria Emergency Response Brief, 28 November 2024
9. According to various SARC and UNHCR reports, 58% of people crossing the borders are children.
10. The figures for Syria are sourced from the UNHCR's Syria Emergency Response Brief, which derives its data from the Syrian Arab Red Crescent database. In line with the inter-agency coordination mechanism in Syria, UNICEF Syria uses the UNHCR figures. Differences in numbers between UNICEF Syria and UNICEF Lebanon SitReps reflect variations in reporting sources, data collection methods, and the verification status of the figures. UNICEF Lebanon Situation Report #9, more than 620,000 people had left Lebanon for Syria since 23 September 2024, including 234,242 Lebanese and 390,656 Syrians, according to the Lebanese General Security Directorate.
11. UNHCR Syria Emergency Response Brief, 17 Nov 2024, the proportion of the Lebanese refugees has been revised to 37%. In the previous UNCHR situation reports, the proportion of Lebanese refugees was reported as 29%.
12. UNRWA Situation Report No.12, Syria Emergency Response to displacement from Lebanon as of 26 Nov 2024.
13. UNHCR Northwest Syria Flash Update No.8, 22 November 2024.
14. UNHCR Syria Emergency Response Brief, 5 December 2024.
15. UNHCR Syria Emergency Response Brief, 2 December 2024.
16. OCHA Situation Update No.1 Displacements from Aleppo to Damascus and Southern Governorates, 3 December 2024.
